

Aerial Work Platform

Aerial Work Platform - There are various forklift attachments obtainable on the market. They can help transform your lift truck so that you can expand your ability to pick items up or accomplish clean up jobs and material handling with greater ease.

Several of the attachments are specifically designed in order to fit on the blades themselves. Fork extensions for example, are used whenever you need more blade length, which increases lifting capacity. Blade extensions come in lengths ranging from 48-120 inches. Triangular or rounded attachments are another variety utilized when moving rolled material so as to ensure it does not roll off of the traditional flat blades.

Examples of lifting attachments comprise pivoting and telescoping boom or crane attachments. They could come in several various styles and are most often utilized for moving lumber, poles, metal bars and different kinds of bulky stuff. Additional attachments like for instance various kinds of hooks and hook plates are existing so as to carry stuff using a sling or chain. Slab lifters and magnetic filters are other objects which can be utilized with hook attachments. Slab lifters are specialized accessories which are designed for picking up a variety of materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that connect to your lift truck in order to make transporting rolls of carpet easier. The accessory connects onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are many types of lift truck accessory designed for facility maintenance such as snow blades. These industrial forks can be attached to front end loaders and used for transferring materials such as dirt, and mulch as well as snow. Other common cleanup accessories include standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the forklift blades connect onto for sweeping big spaces like parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up quick and effortless.

Material spreaders are other accessories used on forklifts. These spreaders are helpful for a range of applications like spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting accessory which many businesses make use of day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units offered that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location making use of the forklift. Larger platform models have additional space for employees in order to bring tools and other essential things for the task. Often work platforms are made of poly material or steel.
