

## JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Recently retired, after spending many years working with his brother to develop their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

During their journey, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable market for a product that could swiftly and safely elevate individuals in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John established a partnership with two friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they manufactured and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into current versions.

JLG lift trucks have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into various marketplaces worldwide and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer environment.
