Doosan Infracore America is the fastest developing forklift and lift truck company in the North American market, thanks to its exceptional level of product performance and their consistently high level of consumer support and service given to all Doosan Infracore Forklift users. The U.S. lift Truck division stationed in Cleveland has a skilled team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the home-based lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a domestic equipment expansion venture. Product sales of these products were primarily targeted to state-run firms, large scale corporations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Daewoo started the first domestic forklift business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a situation of significant expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling market. This project proved highly successful for Daewoo and their lift truck sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the corporation had a international sales system and started exporting models they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas marketplaces.
